

Company Overview

Founded in 1998, Switch and Data is a premier provider of network-neutral data centers that house, power, and interconnect the internet. Today, Switch and Data operates 34 neutral interconnection and collocation facilities, providing business-enabling services to global customers who rely on us to connect them to other customers and exchange Internet traffic:

- Application Service Providers
- Content Delivery Networks
- Content Providers
- Enterprises
- Gaming Companies
- Internet Service Providers
- Managed Service Providers
- Multiple Service Operators
- Search Engines
- Telecom Providers
- VoIP Providers
- Web Commerce

Service Is Our Specialty

The company has built a reputation for world-class service, delivered across the broadest collocation footprint and richest network of interconnections in North America. Switch and Data provides one of the highest customer satisfaction scores for technical and engineering support in the industry, and is home to PAIX® – the world's first commercial Internet exchange. Our experienced professionals work closely with you to understand your business, identify your specific challenges, and help you achieve desired goals.

Where Networks Meet and Exchange

Switch and Data gives clients access to more markets than any other collocation service provider, and more networks for bandwidth abundance and network redundancy. We are committed to providing clients with reliable and cost-effective reach to their customers, employees and suppliers – all in a neutral marketplace built for your business.

Switch and Data's sites allow you to colocate mission-critical equipment and have a choice of interconnecting to over 400 distinct networks across our footprint. In addition, our PAIX® services currently enable the greatest volume of peering participants, and are optimized to meet Internet service and content providers' peering and transit needs.

34 Locations

With 34 facilities, Switch and Data provides the largest footprint in North America. By providing you with access to more markets than any other provider, you can deploy nationally through a single Switch and Data location, while gaining a considerable time-to-market advantage.

Colocation Solution

Switch and Data's colocation services provide customers with a reliable, secure, and climate-controlled environment. Each of our 34 colocation facilities feature flexible space options, redundant power and cooling systems, physical security, and other sophisticated systems for fire suppression and water leak detection. Proactive uptime Service Level Agreements (SLA) guarantee that our colocation services will be available not less than 99.999% of the time.

Interconnection Solution

Switch and Data's interconnection services provide customers with a range of options to exchange traffic: from direct interconnects, to SingleCNXT®-i, to our industry-leading PAIX services that allow participants to publicly and privately peer through the world's largest Internet exchange point.

Internet Exchange Solution

Switch and Data's PAIX services enable Internet service providers and content providers to take advantage of more interconnection choices, quicker time to market, access to more networks, vast peering and transit opportunities, and a richly diverse customer base – all available in highly secure and reliable facilities. Our PAIX capabilities are available in 6 markets across North America.
