

Seattle – The Westin Building

2001 Sixth Avenue, The Westin Building, Suites 500, Seattle, WA 98121, USA

Building Specs

Switch and Data has two data centers in Seattle. We are at 1914 Third Avenue and at 2001 Sixth Avenue. The Switch and Data Sixth Avenue data center is located within The Westin Building, the Pacific Northwest's premiere carrier hotel and telecommunications hub. This Switch and Data data center is a 12,593 square foot facility with numerous connectivity options and 24x7 on-site security and technical support. We offer colocation, interconnection and PAIX peering services at this location.

Square Feet	12,593
Floor Load	Engineered on a case-by-case basis
Elevators	3,000-pound freight elevators; interior dimensions at 9 x 6.5 feet
Ceiling Height	12 feet from slab to slab (no raised floor in this suite)
Roof Rights	Roof rights available with satellite space
Line of Sight	Each request will need to be verified as new buildings are being constructed
NPA-NXX	206-239, 443, 441, 623, 958
KVM Cart	KVM cart available upon request

Environmental Controls

Fire Suppression	Dual Pre-Action Double Interlock Dry Pipe system
HVAC	A/C units maintain a climate of 72 degrees (+/- 5) and 30-60% humidity, N+1 redundancy with 1120KW of heat rejection capacity

Power Systems

Power Redundancy	This suite is a dual feed grid to each UPS system independently, for true redundancy. UPS distribution systems support redundant 1260KW primary with 30% additional for redundant circuits.
Standby Generator	The site is supported by a total 9300KW generator support (generators are building owned)

Security Systems

Security Systems	24 x 7 on-site security, lobby security, card key access, alarm/key monitoring, and CCTV surveillance
-------------------------	---

Connectivity

Public Peering	This location offers Switch and Data PAIX services
